Ingelvac MycoFLEX®

suspension for injection for pigs

Active Constituent

Each 1 mL dose contains:
Mycoplasma hyopneumoniae
Min RP* 1.0, Max RP* 4.61
* Relative Potency

For active immunisation of healthy pigs from three weeks of age or older as an aid in the reduction of lung lesions following infection with *Mycoplasma hyopneumoniae*.

Under field conditions, vaccine efficacy has been established by reduction of lung lesions.

Onset of protection occurs by two weeks post vaccination and lasts for at least 26 weeks.

DIRECTIONS FOR USE

DO NOT mix with other vaccine/immunological products except for Ingelvac CircoFLEX®.

Occasional sensitivity reactions (anaphylaxis) may occur. In such a case administer adrenaline immediately.

Shake well and use immediately.

Administer a single 1 mL dose intramuscularly, irrespective of body weight, preferably in the neck.

To be mixed with Ingelvac CircoFLEX®:

For immunisation from three weeks of age.

Use the same package size of each vaccine.

Aseptically transfer the full content of each vaccine bottle into a pre-sterilised plastic or glass container of at least double the capacity of the vaccine bottle by using pre-sterilised transfer needles.

Shake well until a uniform colour of the mixture is obtained.

Administer one dose (2 mL) of the mixture intramuscularly to each pig. Use entire content immediately after mixing.

WITHHOLDING PERIOD: NIL

Disposal

Dispose of empty container by wrapping in paper and putting in garbage.

Storage

Store between 2°C and 8°C.
Do not freeze.
Protect from light.
Use entire contents when first opened.

Packaging

High-density polyethylene bottles of 10 mL, 50 mL, 100 mL or 250 mL with a chlorobutyl stopper and lacquered aluminium seal.
